

# LTLNC150-G | DATASHEET

# LED line light 150 mm, green, 525 nm

### **SPECIFICATIONS**

#### **Lighting specifications**

| Illumination area width      | (mm)                | 150           |
|------------------------------|---------------------|---------------|
| Illumination area height     | (mm)                | 15            |
| Optimal working distance     | (mm)                | 20-100        |
| Number of LEDs               |                     | 28            |
| Light color, Peak wavelength |                     | green, 525 nm |
| Spectral FWHM                | (nm)                | 30            |
| Illuminance <sup>1</sup>     | (klux)              | n.a.          |
| Irradiance <sup>1</sup>      | (W/m <sup>2</sup> ) | -             |
|                              |                     |               |

#### **Electrical specifications**

| · · · · · · · · · · · · · · · · · · · |           |                  |
|---------------------------------------|-----------|------------------|
| Supply voltage <sup>2</sup>           | (V)       | 24               |
| Current <sup>2</sup>                  | (mA) 1400 |                  |
| Power consumption                     | (W)       | 34               |
| Typical pulse voltage                 | (V)       | 31               |
| Max pulse current                     | (mA)      | 4000             |
| Peak power consumption                | (W)       | 124              |
| Max pulse duration                    | (ms)      | 100              |
| Max duty cycle                        | (%)       | 5                |
| Estimated MTBF <sup>4</sup>           | (hours)   | > 20000          |
| Connector                             |           | M8               |
| Included cable                        |           | CBLT003 included |

<sup>1</sup> Measured at minimum working distance

 $^{2}\pm2\%$ 

<sup>3</sup> With constant driving voltage

<sup>4</sup> Drop tp 50% intensity @ 25°C

# **KEY ADVANTAGES**

**Ultra high power** 

**Color matched white model** 

Condenser lens for a perfectly focused beam of light

**Rugged industrial design with built in industrial connector** for easy integration into any machine vision system.

Forced air cooling option

**LTLNC series** are ultra-high power LED line illuminators designed for line scan applications. Their special design provides both a powerful and homogeneous beam of light that is sharply focused onto the object that must be inspected, by means of a condenser lens.

#### **Mechanical specifications**

| Length          | (mm) | 200.0                                |
|-----------------|------|--------------------------------------|
| Width           | (mm) | 32.0                                 |
| Height          | (mm) | 60.0                                 |
| Mass            | (g)  | 200                                  |
| Clamping system |      | 4x M3 threaded holes                 |
| Cooling method  |      | air compressed cooling<br>or passive |

#### **Environment**

| Operating temperature       | (°C) | 0-40                  |
|-----------------------------|------|-----------------------|
| Storage temperature         | (°C) | 0-50                  |
| Operating relative humidity | (%)  | 20-85, non condensing |
| Installation                |      | Indoor use only       |

#### Eye safety

Risk group 2

# **COMPATIBLE PRODUCTS**

#### Full list of compatible products available here.

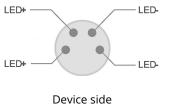

A wide selection of innovative machine vision components.

All product specifications and data are subject to change without notice to improve reliability, functionality, design or other. Photos and pictures are for illustration purposes only. Data are reported by design, actual lens performance may vary due to manufacturing tolerances.

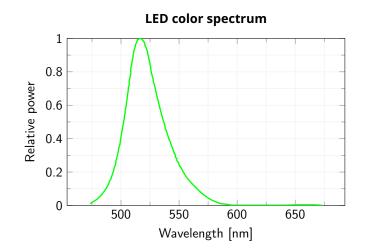

# LTLNC150-G | DATASHEET

# **CONNECTOR PINOUT**

| Function | Cable color |  |
|----------|-------------|--|
| LED +    | Brown       |  |
| LED +    | White       |  |
| LED -    | Blue        |  |
| LED -    | Black       |  |

# LIGHT BEAM COARSE ADJUSTMENT

Simply untighten the lateral screws to adjust the axial position of the condenser lens.

When the position is set, do not overthighten the screws to avoid damage to the condenser lens.
