

Mantua, July 20th 2026

Discontinued product notification - FabImage® Software Products

Dear Valued Customer,

This letter is to inform you that Opto Engineering® will discontinue **FabImage® Studio Professional series** & **FabImage® Library Suite series**.

The affected standard part numbers are listed in **Appendix A**. Please note that also any customized or non-standard part numbers based on the standard versions, even if not explicitly listed, are also subject to discontinuation.

Important dates

Milestone	Date	Links / Notes
Last Order Date for Developer, Runtime, Add-On and Service licenses	21 September 2026	
Last day to update file-based licenses bound to Computer-ID or USB Dongle-base licenses	21 September 2026	Applicable to customers currently using earlier versions and entitled to updates
End of FabImage® Software Updates	21 September 2026	The latest and final released version is FabImage® 5.6
End of Access to FabImage® User Area	21 September 2027	https://www.fab-image.com/user_area/
End of Access to online FabImage® Documentation	21 September 2027	https://docs.fab-image.com/studio/introduction/index.html
Last day to activate new file-based licenses bound to a Computer-ID	21 September 2027	https://www.fab-image.com/en/download/instructions/

After **21 September 2026**, it will no longer be possible to:

- Purchase any FabImage® software license
- Purchase or renew Service Licenses required to receive technical support & software updates (FIS-EXT, FIL-EXT, ADD-EXT, DL-EXT)
- Update file-based or USB Dongle-based licenses

After **21 September 2027**, it will no longer be possible to:

- Access the [FabImage® User Area](https://www.fab-image.com/user_area/), necessary to download software installers & activate new file-based licenses bounded to Computer-ID

This advance notice is provided to allow customers sufficient time to evaluate their future requirements, complete any planned purchases, and make appropriate transition arrangements before the end of sale date.

Existing Installations

FabImage® Developer, Runtime and Add-On licenses are perpetual. All licenses purchased before the discontinuation date remain valid and usable according to their original licensing terms. This discontinuation does not, by itself, disable valid perpetual licenses or intentionally interfere with existing installations: applications and machines already running FabImage® software will continue to operate normally.

Software Updates and Technical Support

Customers with active Technical Support and Software Update entitlement may update their FabImage® license to the latest released version (FabImage® 5.6) until 21 September 2026.

FabImage® software installers will remain available for download through the FabImage® User Area, using existing login credentials (email and password), until 21 September 2027.

After 21 September 2026:

- No further FabImage® software updates will be released.
- The latest and final released version will remain FabImage® 5.6.
- License updates to the latest released version (FabImage® 5.6) will no longer be available.

After 21 September 2027:

- The FabImage® User Area will no longer be accessible.
- FabImage® software installers will no longer be available for download.

We strongly recommend updating your license (if applicable) before 21 September 2026 and downloading and securely archiving all required installers before 21 September 2027.

Details regarding Service Licenses are provided in **Appendix B**.

Links to FabImage® software installers are available in the FabImage® User Area and are also listed in **Appendix C**.

Important Notice for Computer ID-based Licenses

FabImage® Licenses activated via Computer ID are permanently bound to the specific hardware on which they are installed. In case of hardware failure or damage to the host computer, the license cannot be recovered or transferred.

After 21 September 2026, it will no longer be possible to purchase, replace, or update these licenses.

After 21 September 2027, it will no longer be possible to activate these licenses.

Failure of a system using a Computer ID-based license after the discontinuation date may result in permanent loss of the license, with no possibility of replacement.

Customers using Computer ID licenses should ensure that any additional license requirements for future installations are addressed before **21 September 2026**, as Computer ID licenses will no longer be available for purchase after that date.

Important Notice for USB Dongle-based Licenses

FabImage® Licenses activated via USB dongle are portable and not tied to a specific hardware system.

Software license updates to the latest released version (FabImage® 5.6) will be available until **21 September 2026**.

FabImage® installers will still be required for software installation or reinstallation. Since these installers will no longer be available for download after **21 September 2027**, we recommend keeping a local copy together with the relevant technical documentation.

For any remote updates of USB Dongle licenses, the following will be required:

- Computer with Wibu's CodeMeter runtime software. This can be installed with FabImage® Studio or downloaded from <https://www.wibu.com/support/user/downloads-user-software.html>.
- Dongle, which will be upgraded.
- Access to Internet required to send and receive WibuCmRa files.

Process of remote update consists of three steps:

1. Creation of WibuCmRaC file, which identifies the customer's dongle.
2. Sending the created file to Opto Engineering®
3. Receiving WibuCmRaU file, which is used to update dongle.

Customers are therefore advised to

- Download and securely archive all required software installers and tools before 21 September 2027 to ensure future system installation or maintenance.

- Update all eligible licenses to the latest available FabImage® software version before 21 September 2026 (applicable to customers currently using earlier versions and entitled to updates), if they wish to benefit from the latest features

Documentation Availability

FabImage® documentation will remain available online (<https://docs.fab-image.com/studio/introduction/index.html>) until 21 September 2027 and is also included in full within the software installation for offline use. After this date, the online documentation will no longer be available. Customers are advised to retain local copies of the documentation.

Recommended Actions

We recommend that customers:

1. Purchase any required FabImage® licenses before 21 September 2026.
2. Activate all file-based licenses bound to a Computer ID (for both current and future deployments) before 21 September 2027.
3. Update all eligible licenses to the latest available FabImage® software version before 21 September 2026 (applicable to customers currently using earlier versions and entitled to updates), if they wish to benefit from the latest features
4. Download and securely archive the required software installers before the FabImage® User Area becomes unavailable (21 September 2027).
5. Ensure that local copies of documentation are preserved together with software installers
6. Contact Opto Engineering® to discuss future machine vision development needs and evaluate alternative solutions.

Contact Information

If you have any questions regarding this notification or wish to discuss your specific application requirements, please contact your Opto Engineering® sales representative.

Further information about Opto Engineering® products is available at: www.opto-e.com

While we regret any inconvenience this announcement may cause, we sincerely appreciate your trust and business over the years and look forward to supporting your future machine vision projects.

This notice does not extend any existing contractual, licensing, support, or maintenance obligations. Unless otherwise expressly agreed in writing, Opto Engineering shall not be responsible for any costs, expenses, business interruption, migration efforts, redevelopment, integration, or other consequential impacts arising from the discontinuation of the product

**APPENDIX A – Affected Part Numbers**

The following table lists all the standard part numbers. Please note that any customized or non-standard part numbers based on the standard versions, even if not explicitly listed, are also subject to discontinuation.

Product Series	Discontinued Part Number	Description	License type	Perpetual
FabImage Studio series	FIS-PRO	FabImage Studio Professional - DEVELOPMENT LICENSE	Development - graphical environment	YES
FabImage Library series	FIL-SUI	FabImage Library Studio - DEVELOPMENT LICENSE	Development for C++ programming	YES
FabImage Studio series	FIS-CODE-ADD	Code Generator for who also wants to add the Library Studio to the FabImage Studio - ADD-ON	Add-on for development - graphical environment	YES
FabImage Studio series	FIS-PAR-ADD	Parallel Add-On for who has purchased FabImage STUDIO or FabImage STUDIO + Code Generator - ADD-ON	Add-on for development - graphical environment	YES
FabImage Library series	FIL-PAR-ADD	Parallel Add-On for who has purchased FabImage LIBRARY Studio - ADD-ON	Add-on for development - graphical environment	YES
FabImage Studio series	FIS-EXT	EXTENSION of tech support & updates for FabImage Studio for ONE YEAR - SERVICE	Service	NO
FabImage Studio series	ADD-EXT	EXTENSION of tech support & updates for FabImage Studio + Code Generator ADD-ON for ONE YEAR – SERVICE	Service	NO
FabImage Library series	FIL-EXT	EXTENSION of tech support & updates for for FabImage Library for ONE YEAR - SERVICE	Service	NO
FabImage Studio series	DL-EXT	EXTENSION of tech support & updates for FabImage Deep Learning add-on for ONE YEAR - SERVICE	Service	NO
FabImage Studio series	FI-DL-ADD	FabImage Deep Learning Add-on - DEVELOPER ADD-ON / FabImage Deep Learning Add-on - RUNTIME ADD-ON	Add-on for development and/or runtime	YES
FabImage Studio series	FIS-RUN-DL	FabImage Studio Runtime for who has purchased Deep Learning Add-on - RUNTIME	Add-on for development and/or runtime	YES
FabImage Library series	FIL-RUN-DL	FabImage Library Runtime for who has purchased Deep Learning - Deep Learning Add-on Runtime - RUNTIME	Add-on for development and/or runtime	YES
FabImage Studio series	FIS-RUN	FabImage Studio Runtime - RUNTIME	Runtime	YES

FabImage Studio series	FIS-RUN-CL-2	FabImage Studio Runtime, Core 2 - RUNTIME	Runtime	YES
FabImage Studio series	FIS-RUN-CL-4	FabImage Studio Runtime, Core 4 - RUNTIME	Runtime	YES
FabImage Studio series	FIS-RUN-CL-6	FabImage Studio Runtime, Core 6 - RUNTIME	Runtime	YES
FabImage Studio series	FIS-RUN-CL-8	FabImage Studio Runtime, Core 8 - RUNTIME	Runtime	YES
FabImage Studio series	FIS-RUN-CL-16	FabImage Studio Runtime, Core 16 - RUNTIME	Runtime	YES
FabImage Studio series	FIS-RUN-TL-2	FabImage Studio Runtime, Thread Limit 2 - RUNTIME	Runtime	YES
FabImage Studio series	FIS-RUN-TL-4	FabImage Studio Runtime, Thread Limit 4 - RUNTIME	Runtime	YES
FabImage Studio series	FIS-RUN-TL-6	FabImage Studio Runtime, Thread Limit 6 - RUNTIME	Runtime	YES
FabImage Studio series	FIS-RUN-TL-8	FabImage Studio Runtime, Thread Limit 8 - RUNTIME	Runtime	YES
FabImage Studio series	FIS-RUN-TL-16	FabImage Studio Runtime, Thread Limit 16 - RUNTIME	Runtime	YES
FabImage Library series	FIL-RUN	FabImage Library Runtime - RUNTIME	Runtime	YES
FabImage Library series	FIL-RUN-CL-4	FabImage Library Runtime, Core 4 - RUNTIME	Runtime	YES
FabImage Library series	FIL-RUN-CL-6	FabImage Library Runtime, Core 6 - RUNTIME	Runtime	YES
FabImage Library series	FIL-RUN-CL-8	FabImage Library Runtime, Core 8 - RUNTIME	Runtime	YES
FabImage Library series	FIL-RUN-CL-16	FabImage Library Runtime, Core 16 - RUNTIME	Runtime	YES
FabImage Library series	FIL-RUN-TL-2	FabImage Library Runtime, Thread Limit 2 - RUNTIME	Runtime	YES

FabImage Library series	FIL-RUN-TL-4	FabImage Library Runtime, Thread Limit 4 - RUNTIME	Runtime	YES
FabImage Library series	FIL-RUN-TL-6	FabImage Library Runtime, Thread Limit 6 - RUNTIME	Runtime	YES
FabImage Library series	FIL-RUN-TL-8	FabImage Library Runtime, Thread Limit 8 - RUNTIME	Runtime	YES
FabImage Library series	FIL-RUN-TL-16	FabImage Library Runtime, Thread Limit 16 - RUNTIME	Runtime	YES
FabImage Studio series	FI-DL-OCR-ADD	FabImage Studio Runtime for Deep Learning OCR ADD-ON - RUNTIME	Runtime	YES
FabImage Studio series	FI-DL-ADD-GPUL-4	FabImage Deep Learning Add-on GPU limit4 - ADD-ON - DEVELOPER	Add-on for development and/or runtime	YES
FabImage Studio series	FI-DL-RUN-OCR-CL-2	FabImage Deep Learning OCR Runtime Core 2 - RUNTIME	Runtime	YES
FabImage Studio series	FI-DL-RUN-OCR-CL-8	FabImage Deep Learning OCR Runtime Core 8 - RUNTIME	Runtime	YES
FabImage Studio series	FI-DL-RUN-OCR-CL-8-2P	FabImage OCR library runtime LICENSE, 2 processes, each process has thread limited 8	Runtime	YES
FabImage Studio series	FI-DL-RUN-OCR-CL-1	FabImage Deep Learning OCR Runtime Core 1 - RUNTIME	Runtime	YES
FabImage Studio series	USB-DONGLE-FI	USB Dongle for FabImage - USB DONGLE	-	YES
FabImage Studio series	USB-DONGLE-RUN	USB Dongle for FabImage Runtime - USB DONGLE	-	YES

APPENDIX B – Service Licenses

Customers entitled to receive Technical support & to update their FabImage® software are those who

- Have purchased a FabImage Developer License (either FIS-PRO or FIL-SUI) from less than 12 months
- Have purchased a Service License (i.e. FIS-EXT / ADD-EXT / FIL-EXT or DL-EXT) after 12 months from the activation of a FabImage Developer License to extend the duration of technical support services for an additional 12 months

Technical support services include

- Most up-to-date version of the software with associated new features and documentation
- Answers, via email, to technical questions related to the use of the FabImage software

The following service licenses are available:

P/N	Description	Category	Features
FIS-EXT	FabImage® Studio EXTENSION	Service License	License required for: 1. Updating the developer license (FIS-PRO) to the last version available with associated new features and documentation 2. Updating the Parallel Processing Add-on licenses (FIS-PAR-ADD and Multithreading) to the last version available with associated new features and documentation* 3. Maintaining active technical support
FIL-EXT	FabImage® Library Suite EXTENSION	Service License	License required for: 1. Updating the developer license (FIL-SUI) to the last version available with associated new features and documentation 2. Updating the Parallel Processing Add-on licenses (FIL-PAR-ADD and Multithreading) to the last version available with associated new features and documentation* 3. Maintaining active technical support
ADD-EXT	FabImage® Studio + Code Generator ADD-ON EXTENSION	Service License	License required for: 1. Updating both types of developer licenses (FIS-PRO and FIL-SUI) to the last version available with associated new features and documentation** 2. Maintaining active technical support
DL-EXT*	FabImage® Deep Learning ADD-ON EXTENSION	Service License	License required for: 1. Updating the Deep Learning Add-on license (FIS-RUN-DL or FIL-DL-ADD) to the last version available with associated new features and documentation*** 2. Maintaining active technical support for Deep Learning

* Parallel Add-on licenses get free updates once you purchase a FIS-EXT or a FIL-EXT

** If you purchase ADD-EXT, you don't need to purchase also FIS-EXT

*** In order to purchase the DL-EXT, the FIS-EXT or FIL-EXT must also be purchased

Customer who have not extended the technical support services, can still:

- Use their Developer License (FIS-PRO or FIL-SUI) and Add-on Licenses (FIS-CODE-ADD, FIS-PAR-ADD or FIL-PAR-ADD, and FI-DL-ADD) but only at the latest version available when their technical support expired
- Purchase and use Runtime Licenses (including Multithreading and Deep Learning ones) but only at the latest version available at the time their support entitlement expired

APPENDIX C – Software installers

Find below comprehensive list of links to the available FabImage® software installers. You must log-in with your existing account (email & password are required)
