

FTLP510C25.4 | DATASHEET

Optical filter, long pass, yellow

KEY ADVANTAGES

- High and precise transmission
- Wide range selection
- Available for fixed focal length lenses and telecentric lenses
- Increase resolution
- Block unwanted light
- Tolerate high temperature environment

Light filtering is a typical need in machine vision applications. Together with LED illuminators, filters can improve image contrast by blocking unwanted light and increase the accuracy and repeatability of the vision system.
