

# PCPW012 | DATASHEET

# Polyview lens for 1/2" sensors

#### **SPECIFICATIONS**

# **Optical specifications**

Image circle	(mm)	4.8
Max sensor size		1/2"
Working distance with min object size <sup>1</sup>	(mm)	40
Working distance with max object size <sup>1</sup>	(mm)	20
Viewing angle	(°)	45
$Wf/N^2$		6

# **Mechanical specifications**

Mount		C
Length <sup>3</sup>	(mm)	231.8
Front diameter	(mm)	117.0
Mass	(g)	907

<sup>1</sup> Working distance: distance between the front end of the mechanics and the object

# **KEY ADVANTAGES**

#### Just one camera

No need for multiple cameras placed around and over the object

# Wide viewing angle

45° object sides view makes otherwise hidden features visible

#### **Complete surface inspection**

Both inner and outer object surfaces can be imaged in one shot

# Very high resolution

Even the tiniest defects can be detected.

**PCPW optics** provide eight different views of the side and top surfaces of an object. The wide view angle (45°) enables the inspection of the side features of an object (for example the threads of a screw or a nut) otherwise impossible to acquire with a single camera.

#### **FIELD OF VIEW**

Diameter x Height	(mm x mm)
Minimum	30.0 x 20.0
Maximum	50.0 x 5.0

# **COMPATIBLE PRODUCTS**

Full list of compatible products available here.

A wide selection of innovative machine vision components.

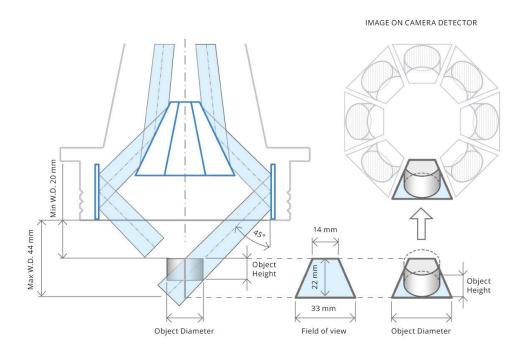

<sup>&</sup>lt;sup>2</sup> The design working f-number (wf/N) is specified. The working f-number could be changed using the variable iris.

<sup>&</sup>lt;sup>3</sup> Measured from the front end of the mechanics to the camera flange.

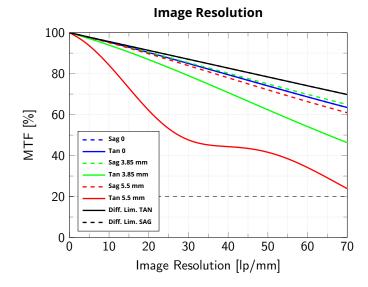

# **WORKING PRINCIPLE AND FOV OF PCMP LENSES**

Eight different trapezoidal fields of view are obtained: all the object features included in such a trapezoid will be imaged on the corresponding image portion.

# PERFORMANCE OF THE IMAGING LENS

Modulation Transfer Function (MTF) vs. Image Resolution, wavelength range 486 nm - 656 nm from the centre to to the corner of the image at wf/6

# **VIGNETTING**

When using LTRN050x45 ring LED illuminator in combination with PCPW0xx optics some vignetting occurs (up to 16% of the total FOV). Image on camera detector will appear as depicted in the schematics. Use the adapter provided with PCPW0xx to securely clamp LTRN050x45.
